Summary

I bring visions to life with high quality code and teach others as I learn and execute. This ambition comes from building full stack applications and presenting their business value to investors and users. I find creative and effective ways to get from point A to point B and solve real world problems. My passion for building technology is shown through my excitement to mentor and help those who approach me to learn.

Experience

Software Engineer II

Henry Schein

Apr 2019 - Present (2 years 2 months +)

- Leveraged proficient knowledge of JavaScript to build features for Dentrax Ascend SAAS
- Developed major enhancements to the availability scheduling feature for dental providers
- Mentored new developers and helped familiarize them with the large code base written primarily in Backbone.js

Web Development Intern

The Church of Jesus Christ of Latter-day Saints

Jan 2019 - Apr 2019 (4 months)

- Led the development of a new UI for portion of critical software that is used in over 130 countries
- Implemented a complex custom table view to display deeply nested JSON data
- Converted legacy portions of software from AngularJS to Angular7

Technical Operations Analyst

Offer Space

Jun 2017 - Jan 2019 (1 year 8 months)

- Created web-scraping Python scripts to generate reports and export them to Google Sheets, which saved a co-worker of mine an average of 5 - 10 hours per week
- Managed the front-end of a complex software built specifically for Direct Response Marketers
- Monitored and maintained over 50 customer-facing websites built for clients

Education

Utah Valley University

Bachelor's degree, Computer Science

2017 - 2022
